087735499904 | folkov11@gmail.com | <https://www.linkedin.com/in/arrashi-satyadi-476918241/>

Cipedak Jagakarsa, South Jakarta

Network & IoT Infrastructure Engineer with 3 years of experience in virtualization, server administration, Cisco networks, and enterprise IT environments. Skilled in ESXi, Proxmox, ADDC, NAS, IoT system integration, and Data Center operations. Strong focus on reliability, performance, and scalable network design.

Pengalaman Kerja

Mitra Teknologi Gemilang (MTG) - Depok Indonesia

Jan 2026 - Sekarang

Autonomous Drone & Alot Engineer / Contract

- Engineered Autonomous Aerial Systems: Designed and built autonomous drone architectures specifically for real-time crowd monitoring and riot detection at large-scale events, ensuring high-reliability video and telemetry transmission.
- Developed AIoT Data Pipelines: Integrated embedded systems (e.g., Flight Controller, GPS modules) with cloud databases to create seamless, end-to-end telemetry networks, bridging field hardware with centralized server infrastructures.
- Spearheaded VTOL R&D: Led the research, prototyping, and transition from standard multirotors to Vertical Take-Off and Landing (VTOL) QuadPlane/Tilt-Rotor designs to enhance aerodynamic efficiency for extended autonomous patrols.
- Optimized Command & Control Networks: Modified flight control systems and integrated custom radio frequency protocols to maintain robust, low-latency command links in high-interference environments.

CNN Indonesia - Jakarta, Indonesia

Feb 2024 - Jun 2024

IT Infrastructure Core System & Broadcast / Internship

CNN Indonesia is a network of free and paid digital news television, as well as a news site owned by Trans Media, which takes the CNN name license from Warner Bros. Discovery.

- Implemented and managed Active Directory Domain Controller (ADDC) for centralized authentication and policy control.
- Configured and maintained NAS storage for centralized access, file sharing, and backups.
- Developed a Broadcasting Resources Installation Manual to ensure accurate deployment and optimal network performance.
- Diagnosed and resolved user computer issues, supporting smooth daily operations.
- Performed routine maintenance to maintain system reliability and security.
- Ensured server stability by troubleshooting outages and restoring critical services.
- Processed system and upgrade requests while preserving network integrity.

Lembaga Pengembangan Komputerisasi, Gunadarma University - Depok, Indonesia

Oct 2023 - Sekarang

Network Course Instructor & Person In Charge / Part Time

- Delivered comprehensive Cisco networking instruction to 100+ learners per semester, covering routing protocols (OSPF, BGP, EIGRP), VLANs, switching fundamentals, TCP/IP, DNS, and network security concepts.
- Led hands-on lab sessions focused on configuring, securing, and troubleshooting Cisco routers and switches, ensuring students gained practical, job-ready skills.
- Provided introductory Linux administration training, including essential commands, networking utilities, and system configuration.
- Communicated complex technical topics clearly and effectively to students with varying skill levels, helping them build strong foundations aligned with real-world engineering environments and certification standards.

Pushansiber Bainstrahan, Ministry of Defence - Jakarta, Indonesia

May 2021 - Sep 2021

Network Engineer / Internship

The Cyber Defence Center, referred to as Pus Han Siber, is an implementing element of the tasks and functions of the Defence Strategic Installation Agency of the Ministry of Defence.

- Designed and implemented load-balancing solutions using Cisco technologies (VRRP, GLBP) to improve network performance, redundancy, and operational reliability.
- Supported the development of the Pushan Siber national cyber-defense network topology, contributing to a secure, large-scale communication infrastructure.
- Built and maintained Data Center network infrastructure, ensuring stable connectivity and secure data flow between critical systems.
- Configured and integrated 10+ Local Area Networks (LANs) across client-server environments, optimizing routing, switching, and segmentation.
- Managed and configured Cisco routers, implementing routing protocols, SSH hardening, NAT, and load-balancing mechanisms to support secure and efficient network operations.

Lembaga Pengembangan Komputerisasi, Gunadarma - Depok, Indonesia

Jun 2024 - Sekarang

IT Infrastructure & Network Engineer / Freelance

LePKom is a Gunadarma University unit that provides students with practical training on computer-based information and communication technology for the workplace.

- Managed and monitored 10+ IBM System servers with high uptime and performance.
- Installed and maintained 50+ VMs/containers on VMware ESXi & Proxmox, including hypervisor setup and optimization.
- Built a remote desktop environment using Apache Guacamole integrated with ADDC for streamlined access.
- Provided IT support for 500+ students, ensuring reliable system and learning infrastructure operation.
- Prepared and deployed 100+ PCs & 100+ thin clients, including application setup and configuration.
- Administered IP addressing across PCs, servers, and network devices.
- Developed an IoT monitoring system for temperature, humidity, smoke, and integrated Bardi devices via custom Flutter-based remote control.

Jenjang Pendidikan

Gunadarma University - Depok <i>Undergraduate Computer System, 3.89/4.00</i> • Recipient of the Full Scholarship Program at Gunadarma University.	Sep 2022 - Sep 2026 (Perkiraan)
Gunadarma University - Depok <i>Diploma, 3.89/4.00</i> • Recipient of the Full Scholarship Program at Gunadarma University.	Sep 2022 - Aug 2025
Perguruan Cikini Vocational High School - DKI Jakarta <i>High School Diploma in Computer and network engineer</i> • Graduating as the best student with the highest score in the Computer and Network Engineering department major.	Aug 2019 - Aug 2022

Skills, Certification & Project

- **Hard Skills:** English Test TOIEC Intermediate Level (770)
- **Soft Skills:** Strong teaching and tutoring skills, including the ability to explain complex technical concepts in clear, structured, and easy-to-understand language.
- **Training:** Computer Engineering Training Course from P2KPTK2
- **Certification** (2025): Computer Network Engineering From BNSP
- **Capstone Project** (2024): IoT Rapid Response Wildfire Detection System
- **Projects In CNN Indonesia** (2024): Centralized Authentication & Storage System Implementation with Windows Server ADDC and NAS In Virtual Box
- **Project Development of Cisco Networking Training Module for VmLePKom:** Developed a comprehensive teaching module (Fundamental, Beginner, Intermediate) covering Cisco routing (OSPF, EIGRP, BGP), switching, VLAN, TCP/IP, and network security
- **Diploma Project** (2025): Integrated IoT System for Monitoring and Controlling the VmLepkom Server Environment Using ESP32 and Bardi Devices
